

Kick Start your Weight Loss

The beginning of a new year brings new challenges and goals - the most common being weight loss. Determined to lose a kilo or three, we look for quick alternatives such as low carb dieting, exhaustive exercising and some take the option of a "soup only" diet. At BeautyWell®, we present a simple yet highly effective solution that will have you losing centimeters from your waist line after only one treatment - as you lie on a massage bed!

The Formostar Detox/Weight Loss Wrap is a safe, versatile and highly effective treatment for body shaping, fat and centimeter loss, skin conditioning, toxin removal and the treatment of muscle strains and injuries.

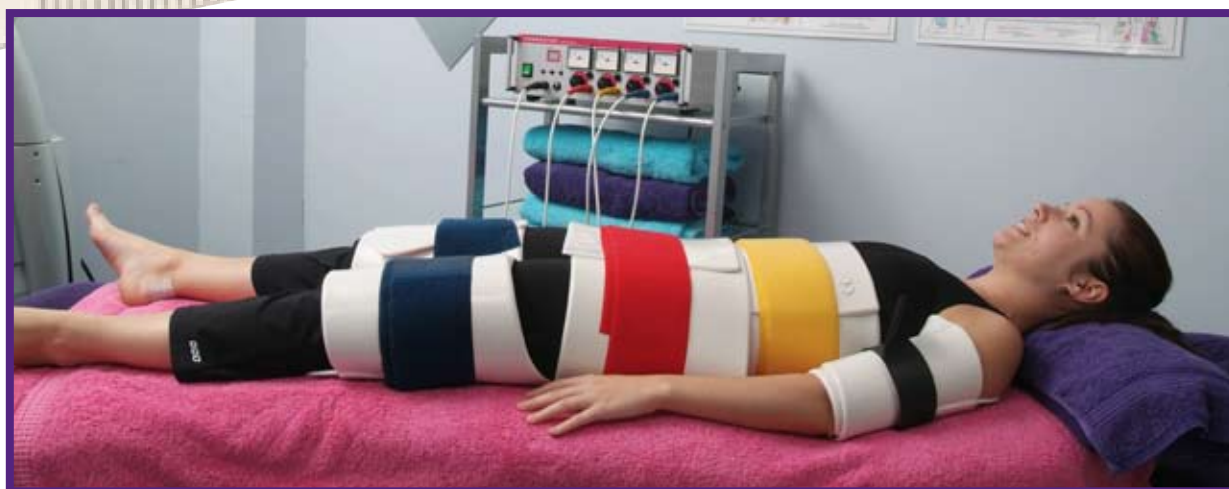

The InfraRed deep heat therapy activates the functions of enzymes and metabolism making it possible to burn up to 1,200 calories in just one 50-minute session.

The body gently heats up during the session inducing sweat, similar to how the body would react during exercise, helping to tone the body. Formostar is like working out while you lie down but without the anaerobic component.

The bandages are placed on specific areas of the body, targeting the arms, abdomen, hips and thighs for women and the chest, hips, thighs and calves for men. The InfraRed heat penetration goes twice as deep, getting at toxins and cellulite that are trapped in pockets below the skin.

Formostar uses InfraRed radiant energy to directly penetrate the body's tissues up to a depth of 2 ½ inches.

It is safe and compatible use, allowing deep heat penetration that is not possible with other methods of heating.

Pricing

Single Treatment -60 min. \$95.00

Course of 3 Treatments \$270.00

Course of 5 Treatments \$425.00
