

Your Essential Guide to the Perfect Spray Tan

Most of us are eager to have a golden tan for summer that everyone will admire but we don't often think about the dangers caused by sun tanning.

To have a nice golden tan gives one the appearance of healthy attractiveness but spending time in the sun can cause sunburn, wrinkles, age spots and much more.

BeautyWell® Spray Tanning provides the perfect alternative to achieve a flawless tan without the harmful effects of the sun's rays.

Our Spray Tan solution is regarded the world over as one of the finest. The unique combination of mineral salt bronzers and the approved cosmetic tanning agent DHA produce a truly remarkable instant tanning result. Our product contains no alcohol, oils, perfumes and no potentially harmful chemicals or preservatives offering you an incredibly safe natural and effective tanning solution.

Here are some hints & tips to ensure you receive the most professional looking spray tan.

Before Tanning

Exfoliate your body the night before the application.

Ensure you thoroughly exfoliate using a granulated scrub. Pay attention to rough skin areas like the knees, elbows, ankles and tops of your feet. This will remove dead skin cells and prolong your tan.

Do not apply moisturiser, deodorant or perfume to your skin at this stage as doing this will reduce the final result. We also recommend that you don't wear any make-up.

We recommend that you wear dark, loose fitting attire as some of the tan may rub-off onto your clothes. This washes out immediately in cold water.

After Tanning

Once your tan is applied, it dries in minutes. We will ensure that your application is dry before you leave, but as a precaution, do not wet your skin for at least 5 hours after the tanning session. Showering the following morning is the best option.

We also recommend that you do not exercise or perspire excessively between the tanning and the showering phase. When showering don't be concerned if some of the initial bronzer washes off - this is part of the tanning process, and your skin will continue to tan.

Apply a tan extender twice daily after showering. This will reduce the rate at which your skin exfoliates and will keep your tan looking better for longer.

Other considerations in maintaining your tan are to avoid long baths, hot spas and extended swimming sessions. Shorter sessions are preferable. Also avoid products designed to exfoliate your skin.

BeautyWell®'s spray tanning solution is one of the fastest and most efficient spray tanning systems in the world offering you an incredibly safe, natural and effective tanning solution.

Individual Spray	\$40
Package of 3 Sprays	\$90
